

The Accountability Lab Pakistan (ALP), with the financial support of the European Union and technical support from The Asia Foundation (TAF) Pakistan and the Department of Health, Khyber Pakhtunkhwa, has officially launched the Coronavirus CivActs Campaign (CCC) under the project 'Strengthening Community Resilience to COVID-19'. This campaign debunks rumours, fake news and misinformation related to COVID-19, conducts fact-checking, synthesizes data, and produces weekly bulletins for mass awareness. This includes important government decisions and vaccination drives, community feedback and concerns, and other questions from the ground around health and other COVID-19 related issues. The goal is to increase awareness among the most vulnerable groups in Pakistan (including but not limited to ethnic and religious minorities, transgender persons, persons with disabilities) and other marginalized communities with a focus on Khyber Pakhtunkhwa and Sindh. These bulletins are translated and disseminated in Urdu and other regional languages such as Pashto (audio version only) & Sindhi to reach far and wide to help citizens build resilience and fight against the pandemic. The bulletins are also shared with a range of stakeholders from the general public, to government departments, donors, CSOs and humanitarian networks via online and offline means.

Myths vs Facts

This is incorrect. It turns out that the symptoms of the Delta variant are very similar to the initial form of COVID-19. The only difference is that the new variant has more adverse effects. Current research showed that the Delta variant attacks our lungs more rapidly. But people who are vaccinated seem to show mild symptoms, like that of the common cold. This means that vaccination is very important for protection against the Delta variant.

We all know that COVID can cause the loss of sense of smell and taste. But it can also lead to "COVID smell". "COVID smell" or Parosmia is a disorder that changes one's sense of smell. Some research suggested that the condition could be affecting millions around the world. Sufferers complain about having a consistent smell of rotten flesh and burning. Moreover it can also impact the sense of taste. According to scientists, the Coronavirus must be going inside our nose and attacking the cells. As a result, our working of the brain gets disturbed and we start smelling the wrong things. More research is required in this domain. Until then, protection against COVID-19 is the best policy.

Closure of educational institutes in districts of KP, Punjab extended till September 15th.

On 3rd September, NCOC had announced plans to close educational institutes in some of the KP and Punjab districts where COVID cases were rising. These districts included Peshawar, Swabi, Malakand, Swat, Haripur, Abbottabad, Mansehra and Dera Ismail Khan in KP. Meanwhile Punjab closed schools in Rawalpindi, Lahore, Gujrat, Gujranwala, Sheikhupura, Sialkot, Faisalabad, Sargodha, Khushab, Mianwali, Bhakkar, Khanewal, Multan, Bahawalpur and Rahim Yar Khan. Unfortunately, seeing no improvement in sight, NCOC decided to extend the closure till September 15th. A day later, the KP and Punjab authorities informed the schools accordingly. The extension also applied to the restrictions on public transport and gyms.

Moderna is trying to make a single dose of COVID-19 booster and flu shot.

Moderna is an American company that designs several vaccines. In fact, it has also developed a vaccine for COVID-19 which is being used in several countries. In a recent development, Moderna announced its plan of designing such a vaccine that will improve immunity against COVID-19 and flu at the same time. If the results are successful, it will take some time to be available in Pakistan.

Vaccination process started for 15 year olds.

Earlier, the vaccination process had been open for 17 years and older citizens. Now under the new government announcement, 15 years can get themselves vaccinated as well. The process of vaccination for 15-18 year old teenagers is similar to older age groups. Firstly, they will have to register themselves by sending their B-form number to 1166. Afterwards, they will have to visit the allocated vaccination centre with the document. Otherwise, they can visit the walk-in vaccination centre and get inoculated after showing their respective B-form. It is important to note that the government has decided to give the Pfizer vaccine to the youngsters. This recent development by the Government is appreciated, as now youngsters can also be safe from Delta and other future variants.

KP had begun COVID 19 vaccination for expatriate citizens.

Many Pakistanis who worked overseas, were stuck in local regions because those vaccines were not available, which were required by the countries where they work. These were usually US made vaccines like Moderna and Pfizer. The case was true for KPK as well and many people from Malakand and neighbouring divisions were protesting at the time. However, KPK had received such vaccines from the US later on and accordingly started the vaccination for expats. Now, many such countries have changed their policies and are accepting China-made vaccines. Moreover, the government has started a booster vaccination scheme for such expatriates

COVID-19 Vaccination

15 to 18 year old citizens are now eligible to get vaccinated.
These citizens will get the  vaccine

Process for registration:

Citizens (All 15+ years)

SMS your CNIC number/ B form to **1166** from any mobile number (that may not necessarily be yours) or visit nims.nadra.gov.pk

After sending your CNIC to 1166, just walk in to the nearest vaccination center in your district along with your **original CNIC** and get yourself vaccinated.
